PROFESSIONAL SUMMARY

Full-Stack MERN Developer skilled in building scalable SaaS platforms, CRMs, admin dashboards, payment systems, and real-time applications. Expert in React.js, Next.js, Node.js, TypeScript, GraphQL, Prisma, and Stripe integrations. Proficient in AWS, Firebase, CI/CD, and Docker with strong focus on security, performance, and clean architecture. I excel at crafting responsive UIs, seamless APIs, and business-driven solutions that are production-ready, scalable, and designed to deliver measurable impact for startups and enterprises.

EDUCATION

Mahavir Swami College Of Engineering & Technology
Bachelor In Computer Engineering
2023- Present

Mahavir Swami Polytechnic
Diploma Engineering In computer
2020 - 2023

RELEVANT EXPERIENCE

Vermillion Tech

Web Development Internship (NEXT JS)
(Dec-2022 - Jan 2023)

- The internship was centered around mastering Next.js, a well-known React framework for creating server-side rendered and statically generated web applications.
- During this time, I developed a real-world project using Next.js, demonstrating my expertise in front-end development and the practical application of Next.js concepts.

Freelancing

Full Stack Web Development
(Jan-2023 - Present)

- I'm a passionate and results-driven Full Stack Web Developer with hands-on experience in delivering high-performance, scalable, and visually engaging websites. Through freelancing, I've successfully completed diverse projects including CRM systems, eCommerce platforms, informative websites, and personal portfolios, all customized to client needs.
- With a strong command over React.js, Node.js, Next.js, and modern web technologies, I bring both technical depth and creativity to the table. I've also led teams and implemented AI-based solutions to enhance functionality and user experience.

Swiftrut Tech

Full Stack Web Development
(July-2024 - Feb- 2024)

- Implemented AI-based solutions into projects, enhancing functionality and user experience.
- Successfully led two projects as a Team Leader, managing tasks such as project planning, work distribution, and ensuring timely delivery.
- Improved team collaboration and efficiency by streamlining communication and task management processes.

Key Skills Acquired:

AI Integration | Project Management | Team Leadership | Task Distribution | Problem-Solving | Communication

PROJECTS

Cpensus - E-Commerce Platform

- An intuitive Shopify-based e-commerce store designed to offer a seamless shopping experience. Cpensus provides users with easy navigation, a secure payment gateway, and real-time order tracking. Personalized product recommendations enhance user engagement, while the platform is designed to offer smooth transactions and a reliable customer journey.

Technology: Shopify

Invoice Management System - CRM for Business

- A business application for generating, tracking, and managing invoices, built using MERN stack. This system automates billing, payment tracking, and client management, making it easier for businesses to handle invoicing processes efficiently. The intuitive UI enhances the user experience and reduces manual tasks.

Technology: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Jewel Art - Online Jewelry Store

- Jewel Art is a premium WordPress-based e-commerce website for jewelry lovers. The site showcases a wide range of rings, necklaces, bracelets, and custom jewelry. Features include secure payment methods, advanced filtering, wishlist, and a blog for jewelry care tips. The site is SEO-optimized for better visibility and user engagement.

Technology: WordPress, WooCommerce

Infero Infotech - IT Solutions Company Website

- A high-performance Next.js website for Infero Infotech, showcasing its portfolio, services, and company goals. The platform is designed with a responsive layout and SEO optimization to ensure visibility. With a modern UI/UX design, it highlights the company's innovative approach to IT solutions and enables visitors to easily explore past projects and services.

Technology: Next.js, React, MongoDB, Tailwind CSS

Wisume - AI-Driven Resume Builder

- An AI-powered resume platform built with MERN Stack that checks the ATS (Applicant Tracking System) score when a resume is uploaded. The platform provides detailed insights on how to improve the score, and with the help of AI, generates highly optimized content for resumes. Users can also select themes to generate professional resumes with high ATS compatibility.

Technology: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Niraj Gupta Impex - Indenting & Sourcing Agent Web

- A responsive website built with Tailwind CSS for Niraj Gupta Impex Pvt. Ltd., an internationally recognized indent agent and sourcing agent based in India. The platform highlights the company's long-standing presence in the import/export industry, including their specialization in dyes and dye intermediates. The website is designed to showcase their services and industry experience, helping them connect with global partners.

Technology: HTML, Tailwind CSS
